

Product Manager, Google

Location: Mountain View, CA (or various other Google office locations)

Minimum Qualifications:

- Bachelor's degree or equivalent practical experience.
- 5 years of experience in product management, product development, or a related role.
- Experience driving product strategy, roadmap, and execution for a software product.

Preferred Qualifications:

- Master's degree or PhD in a technical field, or MBA.
- 8 years of experience in product management with a focus on [specific domain, e.g., AI/ML, Cloud, Ads, Search, Android, Consumer products].
- Experience taking one or more products through the full product cycle, from concept to launch to obsolescence.
- Demonstrated ability to influence diverse stakeholders without direct authority.
- Strong technical understanding with the ability to engage with engineering teams on architectural decisions and technical trade-offs.
- Excellent communication and interpersonal skills, with the ability to articulate complex technical concepts to a non-technical audience.
- A passion for solving complex user problems and shipping innovative products.

About the Job: As a Product Manager at Google, you will be responsible for defining, launching, and iterating on products that delight users and drive Google's mission forward. You will work cross-functionally with Engineering, UX, Research, Sales, and Marketing teams to identify market opportunities, build product strategy, and deliver innovative solutions. You will be expected to be a strong advocate for the user, a deep understanding of the competitive landscape, and a passion for technology.

Responsibilities:

- Define and communicate the product vision, strategy, and roadmap for your product area.
- Lead the ideation, technical development, and launch of innovative products.
- Establish shared vision across the company by building consensus on priorities leading to product execution.
- Gather and synthesize user feedback, market research, and competitive analysis to inform product decisions.
- Translate product strategy into detailed requirements and prototypes.
- Work closely with Engineering, UX, and other cross-functional teams to design, develop, and deploy products.
- Drive product launches, working with Marketing and PR to ensure successful adoption.
- Monitor product performance, analyze key metrics, and iterate on features to achieve product goals.
- Act as a product evangelist, both internally and externally.

Google is proud to be an equal opportunity workplace and is an affirmative action employer. We are committed to equal employment opportunity regardless of race, color, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, gender identity or Veteran status. We also consider qualified applicants regardless of criminal histories, consistent with legal requirements.
