

Golden State Warriors

2023–2024 NBA Season Performance Analysis

Sports Analytics Report

1 Team Overview

The Golden State Warriors concluded the 2023–2024 NBA regular season with a record of **46–36**, finishing in the middle tier of the Western Conference.

- **Offensive Rating:** Above league average
- **Defensive Rating:** Below top-tier playoff teams
- **Primary Identity:** Perimeter-oriented offense centered around Stephen Curry

Despite aging core players, the Warriors maintained offensive competitiveness, but defensive inconsistency limited their ceiling against elite opponents.

2 Team Statistical Summary

Metric	Value	League Rank (Approx.)
Points Per Game	117.8	Top 10
Opponent Points Per Game	115.2	Middle
Three-Point Attempt Rate	High	Top 5
Pace	Moderate	—

Table 1: Team-Level Performance Metrics

3 Player Statistics (Per-Game Averages)

Player	GP	MPG	PPG	FG%	3P%	RPG	APG	PER
Stephen Curry	74	32.7	26.4	.450	.408	4.5	5.1	21.7
Klay Thompson	77	29.7	17.9	.432	.387	3.3	2.3	14.9
Jonathan Kuminga	74	26.3	16.1	.529	.321	4.8	2.2	15.8
Andrew Wiggins	71	27.0	13.2	.453	.358	4.5	1.7	12.3
Draymond Green	55	27.1	8.6	.497	.395	7.2	6.0	14.1
Chris Paul	58	26.4	9.2	.441	.371	3.9	6.8	15.6

4 Offensive System Analysis

The Warriors' offense remained heavily dependent on **Stephen Curry's off-ball movement and three-point gravity**. Curry posted a usage rate above 30% while maintaining an elite true shooting percentage.

Key characteristics:

- High volume of off-screen actions
- Strong spacing enabled by shooting threats
- Pick-and-roll creation primarily involving Curry and Chris Paul

However, offensive efficiency dropped significantly when Curry was off the floor, revealing a lack of secondary elite shot creators.

5 Defensive Analysis

Defensively, the Warriors relied on switching schemes anchored by Draymond Green. While effective against ball movement teams, the roster lacked consistent rim protection.

Observed weaknesses:

- Difficulty containing elite interior scorers
- Defensive rebounding issues against larger lineups
- Transition defense inconsistency

These limitations were structural rather than schematic.

6 Shot Profile: Stephen Curry

Stephen Curry attempted over half of his field goals from beyond the three-point line, maintaining efficiency well above league average.

- Above-the-break threes: primary scoring zone
- Limited mid-range usage
- High efficiency on off-dribble shots

This shot distribution continues to warp defensive coverage and remains the foundation of the Warriors' offensive value.

7 Season Evaluation and Outlook

Strengths:

- Elite perimeter shooting
- High basketball IQ and ball movement
- Emergence of Jonathan Kuminga as a reliable scorer

Limitations:

- Aging core players
- Defensive ceiling constrained by roster composition
- Over-reliance on Curry for offensive creation

8 Conclusion

The 2023–2024 Golden State Warriors remained a competitive playoff-caliber team, but structural roster constraints prevented championship-level performance. Without defensive upgrades or additional shot creation, postseason success relied heavily on shooting variance.
